Launch an AMI Instance

1. Open the EC2 console.

Note: Be sure to select the AWS region you want to launch the instance in

2. From the navigation bar, choose AMIs

CLOUD SERVICES

Launch an AMI Instance

3. Find the AMI you want to use to launch a new instance. To begin, open the menu next to the search bar, and then choose one of the following:
 - If the AMI you're using is one that you created, select Owned by me.
 - If the AMI you're using is a public AMI, select Public images.
 - If the AMI you're using is a private image that someone else shared with you, select Private images.
4. Select the AMI, and then choose Launch.

CLOUD SERVICES

Launch an AMI Instance

5. Choose an instance type, and then choose Next: Configure Instance Details.
6. Review the Instance Details, and then choose Review and Launch.
7. Choose your preferred boot volume, choose Next, and then choose Launch.
8. Select an existing key pair or create a new key pair, select the acknowledge agreement box, and then choose Launch Instances.
9. Choose View Instances to check the status of your instance.

THANK YOU
